

# Case History 132

## New York State Thruway

2012

The New York Thruway purchased Switch-N-Go™ to overcome a budget reduction. Maintenance Department labor hours were cut significantly and therefore fewer trucks could be maintained. Through research, New York Thruway found that with Switch-N-Go™ they could achieve the same amount of work with **fewer trucks**.

Now, the Thruway has more than a dozen chassis outfitted with Switch-N-Go™. Each chassis possesses multiple job responsibilities, using a combination of bodies, designed specific to the task. Some examples of the way the Thruway uses their system are:

- Chipper Truck
- Dump Truck
- Flatbed-Stake Body
- Mobile Storage Bodies
- Spreader Body
- De-Icer Fluid Body

*All in ONE TRUCK!*

The Switch-N-Go System is versatile and has a wide variety of bodies for work trucks in the 11,000 GVW to 26,000 GVW range. Distributors are in most metropolitan areas call 888-311-0867 or go to [www.switchngo.com](http://www.switchngo.com) for more information.
