

Case History 61

“You’d be crazy not to buy this system!”

Adding shelves to this drop box allows Mike to transport 200 flats of flowers at one time.

Sprayer units mounted to a Switch-N-Go subframe help the crew keep up with grounds maintenance.

“When the University of Pittsburgh first purchased a Switch-N-Go System in January of 2005, it didn’t take the property management crew long to become attached to it. In short, we love this system.

Switch-N-Go is a great tool for accomplishing many different jobs. We used to have to throw mulch in a dump truck, dump it out and then transport the loads individually with wheelbarrows. With Switch-N-Go, we can now drop a body loaded with mulch and shovel directly out of the box, all while someone else is grabbing another loaded body. It keeps my guys working.

With any university or company, budgeting is always an issue. For us, equipment costs are always a top concern and we did not have the funds available to purchase multiple trucks at the same time. With Switch-N-Go we didn’t even have to consider buying another truck.

Besides the standard bodies we own, we have also purchased Switch-N-Go subframes and mounted our own custom bodies on them. With Switch-N-Go, we have the opportunity to create a “machine” that fills our specific needs. We took a drop box and added shelves, allowing us to transport 200 flats of flowers at a time. This eliminated the hassle of making 5 trips with the truck to pick up flowers. We also mounted sprayer units to a Switch-N-Go subframe so we can better keep up with grounds maintenance around the campus. This product is so diverse, we’ll never buy another truck without the Switch-N-Go System here at Pitt.

Switch-N-Go is safe to load, it reduces our labor costs while increasing our productivity, and it is fully customizable. You’d be crazy not to buy this system!”

Mike Cecere, Fleet Manager
University of Pittsburgh

The Switch-N-Go System is versatile and has a wide variety of bodies for work trucks in the 11,000 GVW to 26,000 GVW range. Distributors are in most metropolitan areas, call 888-311-0867 or go to www.switchngo.com for more information.
