

Case History 77

“VERSATILITY, NEED I SAY MORE!”

“Three years ago I was talking to a neighbor about how I needed a dump truck and he told me about the Switch-N-Go system. After researching this detachable system I made my move and dollar wise this was the wisest business decision I could have made.

At the time I owned an industrial painting business. We would take the drop box and crew to the site leave the box for them to use for cleaning at the job. I would continue on to the next work site.

I really only wanted the Switch-N-Go system for my painting business. People would see how this body could be dropped off that they started asking to rent the drop box. After seeing the versatility of the system I decided to start a rental service for hauling debris. It took off so well that I now make more money at this than my painting business. I now own 10 Drop Boxes and a Platform body, and there rented most of the time.

This purchase has been a cost savings to my businesses, saving me money on extra trucks, employees, insurance, license fees and the over all maintenance and up keep of equipment.

The Switch-N-Go system is unbelievably smooth, easy to operate and low maintenance.”

Farben Inc
Bob Hilko
Farrell, PA

The Switch-N-Go System is versatile and has a wide variety of bodies for work trucks in the 11,000 GVW to 26,000 GVW range. Distributors are in most metropolitan areas call 888-311-0867 or go to www.switchngo.com for more information.
