*“For a medium duty application the **Switch-N-Go™** is perfect”*

Construction Services Unlimited

“The best benefit of owning a **Switch-N-Go™** System is defiantly the versatility with the use of one truck chassis. I am a building contractor so it allows me to move containers around my jobsite from job to job without being restricted by large container sizes, which is an enormous plus. Most of our work is tight space, new construction, so having large containers on the job site is defiantly a negative. It is also nice to be able to move containers around the job site weather they are full or empty. We have a flat bed body which we use to move compact excavating equipment and also a hydroseeder. Overall, it was the versatility of the system that sold me.

A friend had shown me a hook lift system, before I made the **Switch-N-Go™** purchase. I just felt that the **Switch-N-Go™** had more to offer for my purpose and what I was going to use it for. The cost was defiantly better over the hook-lift chassis. I have the electric system and I usually use it every other day.

For a medium duty application the **Switch-N-Go™** is perfect. I bought the hoist system, two drop boxes and a flatbed body from one of Switch-N-Go’s Gold Star distributors, and I had a great experience.”

T. Tolla (2009)

The system is versatile and has a wide variety of bodies for Work Trucks in the 11,000 GVW to 26,000 GVW range. Distributors are in most metropolitan areas, call 888-311-0867 or www.switchngo.com for more information.
