

Case History 34

For Curtis Landscaping, The Need to be Versatile is Critical

Jay of Curtis Landscaping in Mesa, Arizona [480-797-7385] says,

“We love it. When I saw this advertised in a magazine, I was bound and determined to try it. We took a chance without even seeing a **Switch-N-Go™** in person. We bought based on seeing the videotape of it in action. ”

“It (The Switch-N-Go System) cost about \$4000 more than a dump bed. We are a small landscaping company. We have 13 employees and 5 vehicles. The need to be versatile is very critical. We use the **Switch-N-Go™** largely as a dump truck. We leave a dump body at the yard and fill it full of trash while we are using the stake body. We also use a lot of trailers, so we have a Class 5 ball hitch on the bumper of the truck.”

“We are planning to buy another one next year. In fact, we won’t buy another truck without a **Switch-N-Go™** on it.”

The system is ideal for a wide variety of bodies for Work Trucks in the 11,000 GVW to 26,000 GVW range. Work Trucks with **Switch-N-Go™** Detachable Truck Body Systems can now meet immediate needs of landscape businesses, institutions, and municipalities. Distributors are in most metropolitan areas.
